1. pre-requisite:

- Install following software:

    + NodeJS (14.18.2)

    + MongoDB (5.0.6.2008R2Plus)

- Create database folder：D:\Tools\dbMongo\db

- Copy Certifications to   D:\data\wwwz

    (If install to another driver, change the db-start.bat accordingly)

2. in mongodb, create super user:

```
use admin
db.createUser({
    user: "superuserAZ",
    pwd: "AndrewZhi168#$",
    roles: [ "root" ]
 })
```

3. **in mongodb, create a database name: test, then its user**

```
use test
db.createUser({
  user: "webreaderw!981",
  pwd: "savety#$7619",
  roles: [{ role: "readWrite", db: "test" },]
})
```

4. Start the Database:

backOffice\db-start.bat

5. Start backend:

node backOffice\bin\server.js
